

Follow up from our meeting at the BSBR conference

New radio-wave breast imaging modality

- Performs better than mammography in dense tissue
- Provides new information to identify lesion types
- Safe effective and comfortable

Thank you for stopping by our exhibition stand at the recent BSBR meeting and discussing the merits of the new breast imaging system MARIA. As discussed we have added you to our mailing list to receive the MARIA update newsletter please find the [latest copy here](#). If you have any further questions or want to discuss using a MARIA system please let me know.

I would appreciate your feedback on the value of this newsletter and your thoughts on MARIA
